

DR10

Easy Diet™

ANALYSIS IN POLE POSITION
3 TIMES FASTER THAN ANY
TRADITIONAL SYSTEM.

mira-adv.it

PATENTED AUTOMATIC ANALYZER FOR MEASURING THE CONCENTRATION OF DIET, FLAVORED AND ENERGY DRINKS.

This project, developed by combining the most up-to-date technology with the tried and tested experience gained by Maselli over the years has revolutionized laboratory measurements of diet drinks. A single analyzer replaces HPLC units, spectrophotometers, titrators and other manual systems and methods for measuring the concentration of drinks. The DR10 indicates the concentration in %STANDARD, in equivalent "Total Acidity", Brix and RD (refractometric degree). It is simple and easy to use, thanks to the system being completely automated; this means no sample preparation or skilled operators are needed.

EASY DIET™ MASELLI IS:

- **Fast;** analysis values ready in just 5 minutes.
- **Easy;** no sample preparation or skilled operators required.
- **Automatic;** simply pour the sample into the beaker and press start.
- **Safe;** no chemical reagents needed.
- **Accurate;** $\pm 0.5\%$ of the measured value.
